

Assignment 2**TCS-362****Neural Network and Deep Learning****UNIT – 3: Shallow Neural Networks**

Q1:-Numerical: Compute weight updates using backpropagation.	CO3	AP
Q2:-Numerical: Apply L2 regularization to a given loss function.	CO3	AP
Q3:-Explain autoencoders and their use in feature extraction.	CO1	UN
Q4:-Case Study: Analyze the use of autoencoders in noise reduction.	CO2	AN
Q5:- Explain the terms:	CO3	AP

(i):- deterministic and probabilistic neural networks

(ii):- Boltzmann machines and RBMs

(iii):- Hopfield networks
